Carbon Lions Launch First Project

Clock Guessing Contest Will Instal Life Saving Equipment At Swimming Pool

Carbon's newest service club, The Lions, who received their charter last Wednesday evening are sponsoring a clock guessing contest and with the proceeds will instal life saving equipment at the local swimming

The contest is this. The clock, which is on display at G. H. Nash and Son's store, is now running on electric current. Tickets will be sold for two weeks and then the clock will be started on a battery. You are to guess what time the clock will stop, which will be when the energy in the battery is exhausted.

No one knows how long the clock will run. Your guess is as go as the next one. No one is barred from the contest and there are \$100 in prises.

There have been a few rumors circulatin that a large percentage of the money raised by
the Lions goes to the States.
This is not so. There is a small
amount of the dues of members
that goes across the line, about
30e per month, and that is all.
All money raised in the commun
ity stays right here. So do not
fear that your money is leaving
the country, it does not even
leave the community.

Tickets on the clock guessing contest are now on sale and may be purchased from any of the following Lions; Art Weigum, Jack Adams, Frank Emery, Norm Nash, Findlay Code, Al Wallace, Maurice Switzer, Bill, Rueben, Ed. and Cliff Oblhauser, Charie Nash, Ernie and Ben Fox, Dick Gimbel, Jim Hun. Elgar and Del Tetz, Renold Neher, Gilbert Harsch, Art Biebrick or Clarence Gross.

Take a guess now. You may be a lucky winner and your contribution may help save someone's life.

STUDENTS TO ISSUE YEAR BOOK

The Carbon Students' Union plans to publish a Year Book for the 1946-47 school term.

A number of well-known business concerns, colleges, etc. will be advertising in this book. No doubt many of the Carbon merchants would also like to avail themselves of this opportunity to support the students and at the same time place their trademark before the public in this manner. A representative of the Year Book Staff will call on you to determine your wishes.

CARD OF THANKS

Mrs. Ruby Mortimer and fam ily wish to thank all for the many kind expressions of sympathy and the many beautiful floral tributes received during their recent sad bereavement.

COMMUNITY CLUB MEETING

The Carbon Community Club met Monday night at the municipal office to draw up a program for the year's activities. Representatives had been invited from all Service, Sports and Young Peoples' clubs, and the Lione, Students' Union, Farmere Union, Legion, AYPA, UYPA, IODE, Fish and Game and Junior Athletic Club were represented. The CCC executive has invited the representatives to attend regular meetings and hopes that all other organizations will attend and support the club.

The program for the year in-

Park and Tennis court cleanup day, April 30.

Clean-up day for cemetery,

Date not set.
Sports Day, June 4th.

Ball tournament, middle of August.

Community Auction. Date not

Justion Wheat Club Show in the early fall.

All funds raised go towards improvements on, and maintenance of the park. Among these expenses are, salary for caretaker, swimming pool and tennis court maintenance, baseball diamond and skating rink care.

Since the organization of the Community Club none of these have been self supporting and must be augmented with money raised at sports days, carnivals,

The Glub must have the interest and support of ALL the community to carry on its activities. It is your club, working for the bnefit of you and your community, so let's all get behind and make this year a successful one all around. The executive gives its time free of charge to plan your entertainment. Support them and help them when you can.

The Community Club would like to point out that the Memorial Fund collected last year is not in their hands.

NOTICE

Commencing Tuesday April 29th the mail will leave Carbon on Tuesdays. Thursdays and Saturdays at 12.30 p.m. instead of 1.00 p.m. On Mondays, Wednesdays and Fridays the mail will leave at 2.30 p.m. The Post Office will be closed daily after April 29th from 12.30 p.m. to 1.30 p.m.

PARK CLEANUP DAY APRIL 30

The road gang have pulled out and are busy building new roads in the municipality!

CARBON NEWS

.. A gang of men poured the cement for the foundation of Karl Schuler's house last Friday

Johnny Atkinson is busy excavating a basement for E. Maxwell's new home in town.

Seeding has atarted in the district with many having quite an amount in now.

Mrs. Len Pozon has been confined to bed for a few days.

Findley Code has purchased the building now housing Cliff's Electric,

Mr. and Mrs. Adam Ohlhausser are Calgary visitors this week.

Don Reid, who has been employed at the Builders Hardware for the past year, has been transferred to Olds and left for that point on Saturday.

Ship lap is now \$71 per M at th local lumber yard compared to \$21 in 1940.

Some 20 Lions attended the Charter Night of the Trochu Club Wednesday evening.

Local nimrods tried out the new trap shooting range on Wed nesday evening and found it great sport. We understand that Hugh Brown has a blunderbus that is dangerous on both ends.

M.D Kneehill Council Meeting

The organization meeting of the Council of the Municipal District of Kneeehill was held in the Municipal Office, Three Hills, on April 2 and 3, with all members of the council pre-

The road work employees are again organized into two camps and the following were hired;

North Camp: Wm Howell (foreman, Victor Gresl, Grant Robertson, Alfred Wik and Raymond Petersen.

South Camp: H. J. Gimbel (foreman), John Esau, Joseph Holwegner, A. M. Peterson, Clarence Grose and Roy Bent.

Motor patrol operators: Paul Elvin, Ernest Wilson and Thos. Sloan.

Orders were placed with Chandler's wood working shop, Beiseker, for the building of two bunk-car bodies.

It was agreed that the ban on municipal roads be reduced to half loads immediately and be entirely removed when the provincial governmen removes the ban on Highways 9 and 21.

A grant of \$150 was authoriz

The organization meeting of ed for the Canadian National e Council of the Municipal Institute for the Blind,

John Prohl of Sunnyslope was appointed poundkeeper, replacing Chester Rist.

The Council reviewed the standing of various parcels of land which have passed through tax recovery proceedings and made arrangements for the sale or lease of same in 1947.

The following officers were appointed for 1947; Reeve, H. Parry; deputy reeve, Matt Schmaltz; assessor, C. J. Christie; agricultural services board, Matt Schmaltz, F. C. Petersen, Russell Rice, W. C. Crawley and J. G. Umbrite.

Application was made for a grant of \$20,000 from the provincial government to be earned on a 50-50 basis on the following roads; Carbon Cemetery East 7½ miles; Rosebud North Road 2 14 miles; Grainger South road 6 miles; Acme west 4 miles; Acme north 1 mile; Allingham Linden 3 3mils; Sunny slope west 3 miles; Three Hills Drumheller 6 miles; Olds

WORLD OF WHEAT

Price Security Versus Income

We hear a lot these days about security and the government has given our farmers price security in the form of a guarantee \$1.35 for their wheat until 1950 or until the British Canadian Wheat Agreement ex pires. It is well to bear in mind that this security is only price security, which incidentally today is aroundy \$1.00 a bushel lowyer than the world market price for wheat. yUnfortunately our farmers do not live on price They live on income and neither our Canadian government or the British Wheat Agreement attempts to provide farmers with income security: for income depends not only on the price, but actually on price multiplied by the quantity sold. Our farmers, therefore, might have price security and still be greatly depressed if only relatively small quantities were

HOUSECLEANING DRIVES "EMPTIES" INTO THE OPEN

Housewives Join Search For E. B. Bottles.

Hundreds of housewives in Alberta's rural and urban districts are reported today to be co-operating in the extensive search to apprehend E. D. Bottles, missing from duty for several months.

"Bottles", commonly known by the full name of "Empty Beer Bottles" and also under the alias of "Empties", may be hiding out in closets, basement cornrs or attics. Housewives in their spring cleaning drive are searching these favorite haunts of "Bottles" in an effort to bring the fugitive to justice. A reward of 20 cents per dozen for apprehension and recovery of Empties is offered by Deliveries Ltd. An acute situation still exists in regard to the shortage of Bottles in Brewing Industry.

Deliveries Limited, Agents for Alberta Breweries, reports present shortages are due soley to "Bottles" disappear ance from work. "Empties" cannot be replaced at this time and anyone knowing the whereabouts of "E. B. Bottles" is urged to communicate with their nearest Deliveries Limited Depot at Edmonton, Calgary, Lethbridge, Medicine Hat, Banff, Blairmore, Camrose, Drumheller or McLennan.

CASH REWARD

In Alberta cities, arrangements have been made for taking "Bottles" into custody and paying reward at the householder's home. At rural points local freight agents will see that "Bottles" is escorted "Collect" to the newest Deliveries Ltd. Depot and cash reward will be mailed immediately on recovery.

sold.

Then again they might have a good income, and yet that income might not not have much purchasing power, which could easily happen if the Canadian dollar continues to decline as it has done since 1914. \$1. today of the farmer's income will only purchase what 61 cents purchas ed in 1914 and only as much as 79 cents purchased in 1939. Should the dollar decline further then even income provided by good sales, and at \$1.35 a bushel, might easily prove insufficient for the farmer's need for his income then might not purchase very much.

EATON'S

FARMER'S COLUMN

By R. J. Milligan
District Agriculturist
M. D. of Serviceberry

Surveying the farm activity at this season of the year one sees a hustle and bustle that goes with spring. The casual observerdo es not see what has gone before and what plans are being executed by all this activity.

Seed has to be cleaned and treated for smut, machinery must be repaired and overhauled, the fields planned out and everything arranged to facilitate seeding operations. A farmer must have his work and equipment so arranged to complete his seeding operations in 10 days. There is such a thing as aptimum growth and if grain is seeded to soon, germination and growth are delayed. If seed ing is done too late, the grain will not have time to mature be fore frost. My remark about the ten days has some merit and reason. Optimum growth is reached when the relationship of day and night approaches an equal length of time. Remember though, that the ten days is the actual time required to seed and does not include delays caused by rain or snow.

During the winter the farmer should have made his plans for the spring and summer operations. Examples of these plans should include such items as a seed plot of at least 10 acres each year to provide high quality seed for the land to be seeded the following year. No one tion is to build the farm upneeds to argue about this as the increase yields and quality of grain grown from such seed is obvious to all grain growers. Another point for considera-

During times of prosperity a farmer should be building up his land so that if times of stress do occur he can plow the land being enriched and extend his operations to keep his income at a high level. If grass or forage is planted the land goes out of cash production. therefore, no income tax on that property, in addition an allowonce on income tax can be deducted for seed purchased. This field should be fertilized each spring to enrich the soil and increase the hay crop. Forage does not remove phosphorus from the land as does a grain crop. Nature makes a small amount of minerals available each year but not as fast as is required for grain crops. If you reason back to the time when your land was new and compare the yields then and now you will note that we receive a smaller yield than one did in

those days.

Therefore, by forage crops and fertilizer we can bring our land back to it's original fertile state. This is good business and sound farming practice. Think it over,

LOCAL DAYLIGHT SAVING

There can be no disputing the fact that the question of daylight saving arouse much controversy in a country mainly concerned with agriculture. Particularly is this the case where local convenience only is at stake. Even during the war when Dominion wide fast time was inaugurated as an emergency measure, there was general complaint from mothers as to its effects upon the sleeping habits of children.

The question has again arisen

by the action of city councils seeking charter amendments which would authorize the institution of daylight saving, where a majority of voters had endorsed the proposal.

yThe municipal laws committee of the Legislature had rejected the proposals of both Calgary and Edmonton in the matter, yet while a delegation from Calgary succeeded in obtaining a reversal of the committee's decision, Edmonton was not so fortunate, the house, in committee as a whole, defeat ing by 30 to 16, a move to put back the daylight saving clause into the bill for amendments to the city's charter. The motive is somewhat obscure for a cabinet minister observed, he "could not follow the reasoning that Calgary should have the right and Edmonton should not'

To the city or town dweller, tied to an office, a store or factory during the sunny hours of a summer day, the prospect of lengthening by one hour the leisure of an evening on which he may enjoy himself in the open, has an allurement with which it is possible to sympathize. Yet, that a certain amount of confusion, as well as inconvenience to the farming community, may surely be foretold as the result of a system that places Calgary, Drumheller and Red Deer in one time zone, with the rest of the province remaining in another.

The best way to keep above those who try to tear you down is not to look down on them!

Years ago a woman used to go to oa doctor to see if she could have children. Today she's got to ask the landlord.

696 muscles hold and move 206 bones of the human body.

OBITUARY

Agricultural Marketing Co-operation

On the second reading of Bill 25 (an Act to provide for the sale and export of Agricultural Products), in the House of Commons, Ottawa, Canada; beloved son of Pioneering Agriculture and Co-operation. Remains resting in the Sanctuary of Lost Freedoms. Interment in the National Museum.

A wrong diagnosis made by his parliamentary physicianfriends at the time he became weak from malnutrition during the war, due to a scarcity of his essential food, freedom, led to transfusions of compulsion that caused his death.

Smart Alex says a brainy woman carns her own living. A sensible conclets some man do it!

Today's new order seems to be disorder!

BEWARE OF WEEDS IN FLAX

Farmers of Alberta will plant an increased flax acreage in 1947. Those who have previously grown this crop are aware of its growth habits and how it differs from cereals. Flax should be planted on clean land It will not compete with weeds. Farmers should either purchase clean seed or be prepared to clean the flax if they obtain commercial seed.

Because of the small size of the seed, difficulties may be experienced in removing weed seeds without considerable loss of the flax. It is preferable to take a rather heavy loss in cleaning and be sure of planting only clean seed, than to plant weed seeds and spend several seasons cradicating the weeds from the farm.

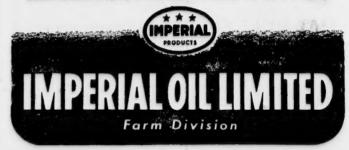

A Kentucky negro woman has just died at the age of 108.

Read what a user of "Stanco" Livestock Spray says:

"We feel it a duty to tell you the results we have had from Stanco Livestock Spray. It really knocks out flies instantaneously. It is impossible to describe the relief it gives to animals. When the black fly pest came our cows were in great misery and we possibly would have lost the whole herd had we not immediately used Stanco. There is no doubt that the lives of quite a number of our cows are owed to Stanco Livestock Spray." (NAME ON REQUEST)

Stanco Livestock Spray is sold by your Imperial Oil dealer or agent.

RECIPE CONTEST

PURPOSE OF CONTEST

The primary purpose behind this competition is to obtain a delicious typical serving which will become famous as Alberta's distinctive dish. The secondary purpose is to awaken the citizens of Alberta to the importance of appetizing food and to improve the standards of food and service, in Alberta's eating places. Good food encourages visitors to this Province to return again. Tourist business is big business — in which everyone shares.

THE PRIZES

The ONE THOUSAND DOLLARS in prizes includes FIRST PRIZE \$500.00 and Gold Medal: SECOND PRIZE, 5200.00 and Silver Medal: THIRD PRIZE, \$100.00 and Bronze Medal. In addition, the Western Stock Growers' Association have offered \$150.00 in cash prizes if the winning recipes are created around Alberta's Good Beef.

JUDGING OF CONTEST

Recips will be judged by leading culinary experts. Every section of the Province shares an equal chance by selection of a winner from zones. Zone winners will assemble at a central point to establish the final winners.

ENTER YOUR RECIPE NOW Contest Closes - Midnight April 30

Annual Weed Control

Experiments have proven that heavy seeding plus fertilizer has been very effective in concolling annual weeds. Heavy seeding increases the quantity of cereal roots in the ground at hen competition between the crop and weeds is most critical. It also promotes quicker shading between the drill rows and greater uniformity of stand.

Fertilizer pushes the young cereal seedlings along quickly in the spring when the soil is cold and damp, thus getting the grain citop shead of the weeds. Fertilizetr also gives a more uniform stand and an earlier mat-

Town Line (regravelling 15 to solve miles): Three Hills Hills west to solve extend the problem of 2 miles: south of 28 and 29-34 miles; west of 3 and 10-33 seeding of the arop. When this method is used seeding should be at about three inches deep, and then rodweeded when the first sprout on the kernel is one inch long. This method has proven very effective on such plants as stinkweed, wild mustard and other annual weeds. It has not proven so effective in controlling wild oats, for which special methods are required.

Harrowing after the grain is up has also proven to be successful in controlling annual weeds such as mustard and
